PROFILE

Software Developer with hands-on experience in developing full-stack web applications and mobile applications, database management, and software implementation. Knowledgeable in SQL, software development life cycle (SDLC), version control, hardware troubleshooting, and computer maintenance. Experienced in analyzing system requirements, documenting workflows, and implementing practical software solutions. Seeking a Junior Developer position to contribute technical expertise, problem-solving abilities, and hardware and software support skills while developing reliable and maintainable applications within a collaborative team.

EDUCATION HISTORY

Information Technology, September 2021 – July 2025

Isabela State University – Roxas, Campus

WORK EXPERIENCE

Web and Mobile App. Development | Freelancer, April 2025 – Current

Freelance / Client-Based Projects

- Develop full-stack web and mobile applications based on client requirements and project specifications.
- Design and manage relational databases, implement application logic, and integrate frontend and backend components.
- Analyze system requirements, document application workflows, and implement features aligned with business needs.
- Apply appropriate development tools, version control practices, and

Frameworks (MERN, LARAVEL)

Communication

Teamwork

testing procedures throughout the software development life cycle.

- Perform computer hardware troubleshooting, repair, and maintenance.
- Install and update operating systems, device drivers, and software applications.
- Diagnose and resolve common hardware and software issues.
- Provide on-site and home-service computer repair and technical support.

Client-Based Projects

1. Sales and Inventory Management

   Tech Stack: Laravel, PHP, MySQL, Blade

   Developed a full-stack sales and inventory management application for business operations.

2. Student Profiling System

   Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, Composer

   Developed a web-based system for managing and organizing student profile information.

3. Learner's Information Management System (LIMSACS) — Aurora Central School

   Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, Composer

   Developed a learner information management system to support student records and school record management.

4. Palahiram — Lending Management Mobile Application

   Tech Stack: React Native, Tailwind CSS, SQLite

   Developing a mobile application for tracking borrower records, loan details, installment payments, and lending summaries.

5. Automated Feed Nutrient Control Application

   Tech Stack: React Native, Tailwind CSS, SQLite

   Developed a mobile application for managing feed nutrient control-related functions.

6. Real Estate Management Application

Tech Stack: MongoDB, Express.js, React, Node.js

Developed a full-stack real estate application using the MERN stack.
